THIS WEEK IN THE GARDEN

Second Week of February
Get Local @ School Product of the Month = Apples

What's Growing?

Worms are a gardener’s best friend. They aerate the soil and break down nutrients to help keep it healthy. Some farmers even use worm castings digested worm material) to provide extra nutrition to their crops. This process is called vermicomposting. For more information on how to incorporate vermicomposting into your gardening strategy, consult your local extension agents or these resources:

Activities

Visit the Growing Minds website for more ways to connect Farm to School with curriculum:
www.growing-minds.org

- Give each student one worm. Ask the students to examine their worms. Can they tell which end is which? How does the worm feel? Ask them to measure the worm’s length. Make sure not to squish them!
- In the garden, ask students to dig for worms. Is the soil cold or warm? Dry or wet? How do worms stay warm in the winter?
- Make a worm note holder by gluing a magnet to one side of a clothespin and small pom-poms and eyes to the other. For more worm crafts, visit:
www.kidactivities.net

Farm to School Book of the Week
Wiggling Worms at Work
Wendy Pfeffer

Worms wiggle all over the garden, tunneling through the dirt, helping plants to grow strong and healthy. This book is all about the life of a worm, from what it eats to the way it moves to the benefits it has for your garden. Students will be interested to study their slimy playground pals, and will learn that worms are actually very helpful to farmers and gardeners.

Journal Topics

- After reading Wiggling Worms at Work, describe in your own words the ways worms help gardens grow.
- Make an advertisement about the great things worms do to help plants grow! Illustrate and describe a worm activity that helps gardeners grow healthy plants.
- Write a silly worm poem. Here is one example:
  I almost screech, It's such a shock When I find a worm under my rock!

Get Local recipe: Apple Winter Squash Bake

Ingredients
- 1 local winter squash, whole (acorn, butternut, buttercup, delicata)
- 3 or 4 local apples
- 1/2 cup walnuts, chopped
- Maple syrup to taste (a good glug)
- 1/2 teaspoon cinnamon
- 1/2 cup apple cider
- Cranberries, a handful

Steps
Preheat oven to 375 degrees.
Cube squash and apples.
Place squash in baking dish with a good glug of maple syrup, cinnamon, walnuts, a sprinkling of cranberries, and apple cider.
Bake until squash is almost fork tender, add apples. Bake until apples are tender.

Encourage students to write on one of the following topics:
