

Plant Part Chart Art

Directions: In each square, draw a picture of two foods you have eaten (or would like to try someday!) that are also an example of the plant part listed in that square. For example, you could draw black beans or almonds for seeds. Flowers are usually the trickiest foods to think of, but there are edible flowers (hint: people often eat vegetable flowers before the flower buds have opened!)

SEEDS	ROOTS
STEMS	LEAVES
FRUITS	FLOWERS
